

“E-BUSINESS AND DISTRIBUTED SYSTEMS HANDBOOK” OUTLINE

MODULE (OVERVIEW): The Big Picture and Case Studies

- Chapter 1: e-Business and Distributed Systems – From Strategies to Working Solutions
- Chapter 2: Case Studies and Examples

E-BUSINESS APPLICATIONS, ARCHITECTURES, AND INTEGRATION

MODULE (APPLICATIONS): e-Business Strategies and Applications

- Chapter 1: e-Business-- From Strategies to Applications
- Chapter 2: e-Business Applications (CRMs, ERPs, eMarkets, SCM, ASPs, Portals)
- Chapter 3: From Strategies to Solutions – A Planning Methodology
- Chapter 4: IT Infrastructure – Overview of Enabling Technologies
- Chapter 5: Applications State of the Practice, Market, and Art

MODULE (ARCHITECTURES): Solution Architectures Through Components

- Chapter 1: Solution Architecture Overview
- Chapter 2: Enterprise Application Architectures - A Component-based Approach
- Chapter 3: Enterprise Data Architectures in Web-XML Environments
- Chapter 4: Architecture Implementation: Concepts and Examples
- Chapter 5: Architectures State of the Practice, Market, and Art

MODULE (INTEGRATION): Enterprise Application Integration and Migration

- Chapter 1: Integration with Existing (Including Legacy) Applications -- An Overview
- Chapter 2: Enterprise and Inter-Enterprise Application Integration (EAI/eAI)
- Chapter 3: Data Warehouses and Data Mining for Integration
- Chapter 4: Migration Strategies and Technologies
- Chapter 5: Integration State of the Practice, Market, and Art

ENABLING IT INFRASTRUCTURE (NETWORKS AND MIDDLEWARE)

MODULE (NETWORKS): Network Services and Architectures in the Internet World

- Chapter 1: Principles of Communication Networks
- Chapter 2: Network Architectures and Interconnectivity
- Chapter 3: Wireless and Broadband Networks -- Next Generation Networks:
- Chapter 4: IP-based Networks and the Next Generation Internet
- Chapter 5: Networks State of the Practice, Market, and Art

MODULE (MIDDLEWARE) : Application Interconnectivity Through Middleware

- Chapter 1: Middleware Principles and Basic Middleware Services
- Chapter 2: Web, XML, Semantic Web, and Web Services
- Chapter 3: Distributed Objects, CORBA, Web Services, J2EE, .NET, SOAP, and EJB
- Chapter 4: Enterprise Data and Transaction Management
- Chapter 5: Middleware State of the Practice, Market, and Art

MODULE (PLATFORMS): Application Servers for Mobile and EC/EB Applications

- Chapter 1: Mobile Application Servers
- Chapter 2: e-Commerce Platforms for C2B Trade -- The Commerce Servers
- Chapter 3: B2B Platforms and Standards -- The B2B Servers
- Chapter 4: Platforms for Multimedia and Collaboration
- Chapter 5: Application Servers State of the Practice, Market, and Art

MANAGEMENT AND SUPPORT

MODULE (MANAGEMENT): Management and Security

- Chapter 1: e-Business Management in Practice
- Chapter 2: Management Platforms for Network and Systems Management
- Chapter 3: Security Management-- Approaches and Technologies
- Chapter 4: Security Solutions -- Using Technologies to Secure Systems
- Chapter 5: Management State of the Practice, Market, and Art

MODULE (TUTORIALS): Tutorials and Detailed Discussions on Special Topics

- Chapter 1: Network Technologies -- A Tutorial
- Chapter 2: Object-Orientation, Java, and UML -- A Tutorial
- Chapter 3: Database Technologies and SQL -- A Tutorial
- Chapter 4: Web Engineering and XML Processing -- A Closer Look
- Chapter 5: CORBA -- A Closer Look

Handbook Detailed Table of Content

MODULE (OVERVIEW): The Big Picture and Case Studies

1 E-BUSINESS AND DISTRIBUTED SYSTEMS -- FROM STRATEGIES TO WORKING SOLUTIONS 1-2

1.1	INTRODUCTION	1-3
1.1.1	What is e-Business and How is it Related to Distributed Computing	1-3
1.1.2	Why So Much Activity in e-Business -- The Promises	1-7
1.1.3	What Can and Does Go Wrong -- The Pitfalls and The Risks	1-11
1.1.4	How to Go From Strategies to Working Solutions	1-15
1.1.5	Why This Book?	1-19
1.2	E-BUSINESS AND DISTRIBUTED COMPUTING EVOLUTIONS -- THE NEXT GENERATION REAL-TIME ENTERPRISES	1-22
1.2.1	e-Business Evolution	1-22
1.2.2	Next Generation Enterprises (NGEs) -- The Digital Real-time Corporations	1-25
1.2.3	Evolution of Distributed Computing Technologies	1-29
1.2.4	Synthesis of e-Business and Distributed Computing Evolutions	1-32
1.2.5	Case Study: GE Evolves into a Real-Time Digital Enterprise	1-33
1.3	FROM STRATEGIES TO WORKING SOLUTIONS -- THE BOOK ROADMAP	1-35
1.3.1	An Overall Approach	1-35
1.3.2	A Reference Model	1-37
1.3.3	Overview of e-Business Applications, Architectures, and Integration	1-39
1.3.4	Enabling IT Infrastructure Overview	1-40
1.3.5	Overview of Management and Security	1-44
1.4	A CASE STUDY: INTRODUCING XYZCORP	1-45
1.5	CONCLUDING COMMENTS	1-47
1.6	REVIEW QUESTIONS AND EXERCISES	1-47
1.7	ADDITIONAL INFORMATION	1-48

2 CASE STUDIES AND EXAMPLES 2-1

2.1	INTRODUCTION	2-2
2.2	SHORT EXAMPLES OF E-BUSINESS STRATEGIES	2-4
2.2.1	Staples Gets into e-business	2-4
2.2.2	Nestle Corporation	2-4
2.2.3	Visteon	2-4
2.2.4	Wired Wellington -- Wiring up New Zealand's Capital	2-5
2.2.5	Stock Research Group (SRG)	2-5
2.2.6	Auto-by-Tel	2-5
2.2.7	Charles Schwab	2-5
2.2.8	Dell Computers	2-5
2.2.9	Miller Industries	2-6
2.2.10	Northern Telecom	2-6
2.2.11	Synchronized Supply Chains	2-6
2.2.12	Review Questions	2-6
2.3	E-COMMERCE/E-BUSINESS EXAMPLES	2-6
2.3.1	Xerox Document Processing Equipment	2-6
2.3.2	Amazon.Com Site	2-8
2.3.3	Amp Inc. Electronic Connectors	2-8
2.3.4	W.W. Grainger - Facilities Management Supplies	2-10

2.3.5	Mitre Corporation - The DISCUS Data Interchange System	2-11
2.3.6	Cisco - Data Communications Equipment	2-11
2.3.7	Web Security at Exostar	2-13
2.4	E-COMMERCE -- ONLINE PURCHASING EXAMPLES	2-14
2.4.1	Getting Sam Started in e-commerce	2-14
2.4.2	A Simple C2B Purchasing Example -- An Electronic Store Front	2-15
2.4.3	A Simple B2B Purchase Example	2-17
2.5	A FINANCIAL MARKETPLACE	2-20
2.5.1	Overview	2-20
2.5.2	EMarket Transactions and Transaction Flows	2-21
2.5.3	An Architectural View	2-24
2.5.4	Review and Discussion Questions	2-25
2.6	CITY OF SEATTLE PUBLIC UTILITIES GO WIRELESS	2-27
2.6.1	Introduction	2-27
2.6.2	Choosing the Computing Platform and Wireless network	2-28
2.6.3	Application Architecture	2-28
2.6.4	Software Approaches	2-28
2.6.5	Review Questions	2-29
2.7	INSURING OUTSOURCED ENTERPRISES IN E-COMMERCE -- A METHODOLOGY	2-29
2.7.1	Overview	2-29
2.7.2	An Approach to Estimate Risks	2-30
2.7.3	Review Questions	2-31
2.8	AN INTEGRATED MANUFACTURING SYSTEM	2-31
2.8.1	Overview	2-31
2.8.2	Review and Discussion Questions	2-32
2.9	A CUSTOMER RELATIONSHIP MANAGEMENT PORTAL -- A TECHNICAL VIEW	2-33
2.9.1	Overview	2-33
2.9.2	Usage Scenarios	2-34
2.9.3	Detailed Design -- Solution Architecture	2-35
2.9.4	Review Questions	2-37
2.10	MIGRATION OF A PROJECT MANAGEMENT SYSTEM	2-38
2.10.1	Overview	2-38
2.10.2	Step 1: Business Drivers and Requirement Definition	2-39
2.10.3	Step 2: Development of a Solution Architecture	2-39
2.10.4	Step 3: Detailed Design and Implementation	2-41
2.10.5	Review Questions	2-42
2.11	CASE STUDIES AND EXAMPLES OF NETWORKS	2-42
2.11.1	ANX- Example of an Extranet	2-42
2.11.2	An Enterprise Network Example	2-44
2.11.3	Example of Public Internet	2-46
2.12	OLDER CASE STUDIES -- A FRESH LOOK	2-48
2.12.1	Hewlett Packard's Migration to Client/Server Architecture	2-48
2.12.2	Off-Shore Reengineering	2-50
2.12.3	University of Florida Reengineers via the World Wide Web	2-51
2.12.4	3Com's Data Warehouse	2-51
2.12.5	British Telecom's Data Warehouse	2-52
2.13	REFERENCES	2-52

MODULE INDEX

EBUSINESS APPLICATIONS, ARCHITECTURES, AND INTEGRATION MODULES

MODULE (APPLICATIONS): eBusiness Strategies and Applications

1	E-BUSINESS -- FROM STRATEGIES TO APPLICATIONS	1-1
1.1	INTRODUCTION	1-1
1.2	CASE STUDY: XYZCORP EMBARKS ON STRATEGIC AND APPLICATION ANALYSIS	1-2
1.2.1	Strategic Analysis Project	1-2
1.3	FRAMEWORK FOR DISCUSSION REVISITED	1-3
1.4	E-BUSINESS STRATEGIES	1-5
1.4.1	Overview	1-5
1.4.2	Business Strategies -- How to Succeed in the Competitive Marketplace	1-7
1.4.3	e-Business Models -- How to Make Money Through e-Business	1-11
1.4.4	IT Strategies -- How to Align IT with Business Needs	1-14
1.4.5	Case Studies and Examples of e-Business Strategies	1-18
1.5	XYZCORP CASE STUDY: SUGGESTIONS ABOUT E-BUSINESS STRATEGIC ANALYSIS	1-23
1.6	E-BUSINESS APPLICATIONS -- ENABLING THE BUSINESS STRATEGIES	1-24
1.6.1	What is an Application?	1-24
1.6.2	Classification of Applications	1-26
1.6.3	e-Business Applications Versus Enterprise Applications	1-28
1.7	EXAMPLES OF E-BUSINESS APPLICATIONS -- THE BUSINESS PATTERNS VIEW	1-29
1.7.1	Consumer to Business (C2B) Applications	1-31
1.7.2	B2E Internal Business Applications -- The ERPs (Enterprise Resource Planning)	1-33
1.7.3	Business-to-business (B2B): Supply Chains and eMarkets	1-34
1.7.4	Consumer to Data (C2D) Applications -- Business Intelligence	1-35
1.7.5	Consumer to Consumer (C2C) Applications - Collaborative Computing and Groupware	1-35
1.8	ANALYSIS OF E-BUSINESS APPLICATIONS -- A MULTIDIMENSIONAL VIEW	1-37
1.9	XYZCORP CASE STUDY: SUGGESTIONS ABOUT E-BUSINESS APPLICATION ANALYSIS	1-41
1.10	E-BUSINESS STRATEGIES TO E-BUSINESS APPLICATIONS	1-42
1.10.1	Overview	1-42
1.10.2	e-Business Strategies and Applications Analysis	1-43
1.10.3	Application Engineering -- Building New applications	1-44
1.10.4	Application Reengineering -- Dealing with Legacies	1-46
1.11	SUMMARY	1-47
1.12	REVIEW QUESTIONS AND EXERCISES	1-47
1.13	ADDITIONAL INFORMATION	1-47
2	E-BUSINESS APPLICATIONS -- (CRMS, ERPS, EMARKETS, SCMS, ASPs, PORTALS)	2-1
2.1	INTRODUCTION	2-2
2.2	CASE STUDY -- XYZCORP IDENTIFIES E-BUSINESS APPLICATIONS	2-3
2.3	E-BUSINESS APPLICATIONS -- ANOTHER LOOK	2-3

2.4	PORTALS: FROM WEB SITES TO VIEW INTEGRATION	2-6
2.4.1	Overview	2-6
2.4.2	Classes of Portals	2-7
2.4.3	Portal Architectures and Software	2-9
2.5	CUSTOMER RELATIONSHIP MANAGEMENT (CRM) SYSTEMS: KEEPING CUSTOMER IN THE FOREFRONT	2-10
2.5.1	What is Customer Relationship Management	2-10
2.5.2	Short Examples of CRM	2-11
2.5.3	Why CRMs?	2-12
2.5.4	Issues in Building CRM	2-13
2.5.5	CRM Technologies and Architectures	2-14
2.5.6	Extending CRM to Business Relationship Management	2-16
2.6	ONLINE PURCHASING SYSTEMS: THE CORNERSTONE OF E-COMMERCE	2-18
2.6.1	Overview	2-18
2.6.2	Example of Setting Up a Simple Online Purchasing System -- Bob's Bicycle Shop	2-19
2.6.3	Web Storefronts and Virtual Shops for Purchasing	2-19
2.6.4	Online Purchasing -- A Closer Look	2-22
2.7	EPROCUREMENT AND ELECTRONIC MARKETPLACES: THE PURCHASING NETWORKS	2-23
2.7.1	Overview	2-23
2.7.2	Electronic Marketplaces (EMarkets)	2-24
2.7.3	Electronic Marketplaces -- A Closer Look	2-25
2.7.4	Examples of eMarkets	2-27
2.7.5	Analysis of eMarkets	2-27
2.7.6	What is the Right eMarket Strategy?	2-28
2.7.7	eMarket High Level Architectures	2-29
2.7.8	eMarket Concluding Comments	2-29
2.8	ENTERPRISE RESOURCE PLANNING (ERP) SYSTEMS: THE BACKBONE OF CORPORATE E-BUSINESS	2-31
2.8.1	Overview	2-31
2.8.2	Classes of ERP Systems	2-32
2.8.3	Requirements of ERP Systems	2-33
2.8.4	Evaluation Criteria	2-33
2.8.5	Future Trends in ERP	2-34
2.9	SUPPLY CHAIN MANAGEMENT SYSTEMS: THE BACKBONE OF B2B E-BUSINESS	2-35
2.9.1	Overview	2-35
2.9.2	Supply Chain Decisions and Models	2-36
2.9.3	"Electronification" of Supply Chain Management ("eSCM")	2-36
2.9.4	Illustrative Examples of Modern Supply Chains	2-37
2.9.5	Selling Chain Management	2-38
2.9.6	Trends in SCM	2-38
2.10	DATA WAREHOUSES, DATA MINING, AND BUSINESS INTELLIGENCE	2-40
2.10.1	Overview	2-40
2.10.2	Highlights of Data Warehouses	2-41
2.10.3	Data Mining and Web Mining	2-42
2.11	OUTSOURCING THROUGH SERVICE PROVIDERS (NSPS, ISPS, ASPs)	2-44
2.11.1	Overview	2-44
2.11.2	Outsourcing Through Service Providers	2-44
2.11.3	ASPs -- A Closer Look	2-45
2.11.4	Classifications of ASPs	2-46
2.11.5	Why are ASPs so Popular?	2-48
2.11.6	ASP versus other SPs	2-49
2.11.7	Why Use an ASP?	2-50
2.11.8	Architectures of ASPs	2-51

	2.11.9	Issues and Trends in ASPs	2-52
2.12		MOBILITY AND MOBILE APPLICATIONS	2-53
	2.12.1	Mobile Enterprise Business Applications (MEBAs)	2-53
	2.12.2	Mobile Commerce (M-Commerce)	2-54
	2.12.3	Voice Commerce (V-Commerce), Positional Commerce (P-commerce), and TV Commerce (T-Commerce)	2-55
	2.12.4	Architectures for Mobile Applications	2-56
	2.12.5	Mobility Trends	2-57
2.13		HINTS ABOUT THE XYZCORP CASE STUDY	2-58
2.14		CHAPTER SUMMARY	2-58
2.15		ADDITIONAL INFORMATION	2-59

3 FROM STRATEGIES TO SOLUTIONS – A PLANNING METHODOLOGY

3-1

3.1		INTRODUCTION	3-1
3.2		CASE STUDY: XYZCORP EMBARKS ON BUILDING SOLUTIONS	3-2
3.3		BUILDING WORKING SOLUTIONS -- AN OVERALL APPROACH	3-3
	3.3.1	Overview	3-3
	3.3.2	An Iterative View of Solution Methodology	3-6
3.4		ENTERPRISE IS PLANNING -- THE FIRST ITERATION	3-9
	3.4.1	Overview – An Enterprise View	3-9
	3.4.2	Step 1: Strategic Analysis	3-11
	3.4.3	Step 2: Enterprise Application Analysis	3-16
	3.4.4	Step 3: Develop a Solution Architecture Sketch	3-18
	3.4.5	Step 4: Assess and Plan Appropriate IT Infrastructure	3-28
	3.4.6	Step 4: Cost/Benefit Analysis	3-30
3.5		XYZCORP CASE STUDY: HINTS AND SUGGESTIONS	3-34
3.6		CASE STUDIES AND EXAMPLES	3-35
	3.6.1	A Financial Marketplace	3-35
	3.6.2	Integrating Manufacturing Processes -- An Example	3-40
	3.6.3	Kinion Furniture	3-41
	3.6.4	Garrett Engine Boosting Systems	3-42
3.7		CHAPTER SUMMARY	3-43
3.8		REVIEW QUESTIONS AND EXERCISES	3-43
3.9		ADDITIONAL INFORMATION	3-44

4 IT INFRASTRUCTURE -- OVERVIEW OF ENABLING TECHNOLOGIES

4-1

4.1		INTRODUCTION	4-1
4.2		CASE STUDY: XYZCORP REVIEW OF IT INFRASTRUCTURE ARCHITECTURE	4-3
4.3		NETWORK SERVICES AND THE INTERNET	4-3
	4.3.1	Overview of Network Services	4-3
	4.3.2	Network Interconnectivity	4-5
	4.3.3	Broadband and Wireless Networks	4-5
	4.3.4	IP Networks and the Internet	4-7
	4.3.5	Private Value Added Networks (VANs).	4-9
	4.3.6	Extranets and Virtual Private Networks (VPNs)	4-9
4.4		COMPUTING PLATFORMS -- OPERATING SYSTEMS AND LOCAL SYSTEMS SOFTWARE	4-10
	4.4.1	Operating Systems	4-11
	4.4.2	Local Systems Software	4-14
4.5		GENERAL PURPOSE MIDDLEWARE	4-16
	4.5.1	Overview	4-16
	4.5.2	Basic Client/Server Middleware	4-16

4.5.3	Web and XML	4-18
4.5.4	Distributed Objects for Enterprise Wide Applications	4-24
4.5.5	Distributed Transaction Support	4-27
4.6	HIGHER LEVEL MIDDLEWARE AND APPLICATION SUPPORT PLATFORMS	4-29
4.6.1	Middleware for Mobile Computing and Wireless Networks	4-30
4.6.2	Enterprise Application Integrators (EAI) and Message Brokers	4-32
4.6.3	Middleware to Support E-commerce	4-34
4.6.4	Electronic Commerce Platforms: Packaging EC Middleware	4-36
4.6.5	Platforms for Application Development and Deployment -- The Application Servers	4-38
4.7	3G DISTRIBUTED COMPUTING ENVIRONMENTS (DOT NET AND J2EE)	4-39
4.7.1	Sun J2EE	4-40
4.7.2	Microsoft's Dot Net	4-40
4.8	PUTTING THE PIECES TOGETHER -- AN EXAMPLE	4-42
4.9	CASE STUDY: OPEN SOURCE-BASED INFRASTRUCTURE	4-43
4.10	HINTS ABOUT THE XYZCORP CASE STUDY	4-45
4.11	SUMMARY	4-46
4.12	REVIEW QUESTIONS AND EXERCISES	4-46
4.13	ADDITIONAL INFORMATION	4-47

5 APPLICATIONS STATE OF THE PRACTICE, MARKET, AND ART 5-1

5.1	INTRODUCTION	5-1
5.2	STATE OF THE PRACTICE: CASE STUDIES AND EXAMPLES	5-2
5.2.1	State of the Practice: General Observations	5-2
5.2.2	Introducing CRM -- A Technical and Organizational Case Study	5-3
5.2.3	A Small CRM For A Small Company	5-5
5.2.4	Case Study of Outsourcing Through an Application Service Provider	5-5
5.2.5	Outsourcing a CRM System	5-6
5.2.6	ERP Systems -- A Case Study of the Good News and the Bad News	5-7
5.2.7	Case Study of a Small ERP System	5-8
5.2.8	Supply Chain Management for Automobile Engines	5-9
5.2.9	e-Business Applications for Lollipops	5-10
5.2.10	Using Mobile Devices for e-Business	5-12
5.3	STATE OF THE MARKET -- COMMERCIAL PRODUCTS	5-12
5.3.1	State of the Market - e-Business Applications	5-12
5.3.2	State of the Market: Enabling IT Infrastructure	5-14
5.4	STATE OF THE ART -- RESEARCH AND TRENDS	5-15
5.4.1	Research Notes	5-15
5.4.2	e-Business Application Trends	5-16
5.4.3	Enabling IT Infrastructure General Trends	5-17
5.4.4	Methodology Research	5-18
5.4.5	Decision Support and Expert Systems To Aid Methodologies	5-19
5.5	EXERCISES	5-20

MODULE INDEX

MODULE (ARCHITECTURES): Solution Architectures - Putting the Pieces Together Through Components

1 SOLUTION ARCHITECTURE OVERVIEW

1.1	INTRODUCTION	1-1
1.2	ARCHITECTURE OVERVIEW	1-3

1.2.1	Basic Definitions	1-3
1.2.2	Good versus Bad Architectures – Some Guidelines	1-5
1.2.3	Solution Architectures -- A Closer Look	1-7
1.2.4	Boundaries of Enterprise Solution Architectures -- What to Include and What Not to Include	1-8
1.2.5	Quick Example of a Solution Architecture	1-9
1.3	WEB-BASED SOLUTION ARCHITECTURES -- FROM HTML TO COMPONENTS	1-11
1.3.1	Overview	1-11
1.3.2	Simple Client-Side Applications	1-12
1.3.3	Small and Medium Sized Applications	1-14
1.3.4	Components (Java Beans and Enterprise Java Beans) and Distributed Objects	1-18
1.4	COMPONENT-BASED SOFTWARE ARCHITECTURE CONCEPTS	1-21
1.4.1	What is a Component and Why Should You Care?	1-21
1.4.2	Granularities of Components	1-23
1.4.3	What is a Component-based Architecture?	1-23
1.4.4	Component-based Architecture Platforms	1-25
1.5	3G ARCHITECTURES – A COMPONENT-BASED APPROACH	1-26
1.5.1	Overview	1-26
1.5.2	Promises and Pitfalls of OCSI Applications	1-29
1.6	A PROCEDURE FOR BUILDING SOLUTION ARCHITECTURES - QUICK REVIEW	1-31
1.6.1	Overview	1-31
1.6.2	Analysis -- Building a Technology Independent Model	1-33
1.6.3	Architectures -- Building a Technology Specific Model	1-35
1.6.4	Implementation	1-36
1.6.5	Deployment and Support	1-38
1.7	EXAMPLES OF ARCHITECTURE PATTERNS -- CUSTOMIZING THE METHODOLOGY	1-39
1.7.1	Overview	1-39
1.7.2	Building Web-based Operational Support Applications (C2B, B2B)	1-40
1.7.3	Building Web-Based Decision Support Systems (DSSs) - C2D Pattern	1-45
1.7.4	Real-time Application Development (C2C)	1-46
1.8	SUMMARY	1-46
1.9	CASE STUDY: XYZCORP EMBARKS ON SOLUTION ARCHITECTURES	1-47
1.9.1	Overall Solution Architecture Project	1-47
1.10	REVIEW QUESTIONS AND EXERCISES	1-48
1.11	ADDITIONAL INFORMATION	1-48

2 ENTERPRISE APPLICATION ARCHITECTURES - A COMPONENT-BASED APPROACH 2-1

2.1	INTRODUCTION	2-2
2.2	COMPONENT-BASED SOFTWARE ARCHITECTURES - REVISITED	2-4
2.2.1	Components Versus Applications	2-4
2.2.2	Business Components as a Foundation of Application Architectures	2-5
2.2.3	Component-based Architectures	2-8
2.2.4	Infrastructure Components	2-10
2.3	COMPONENT-BASED ARCHITECTURE PLATFORMS: WEB SERVICES, J2EE AND .NET	2-11
2.3.1	XML Web Services (http://msdn.microsoft.com)	2-11
2.3.2	Sun's J2EE (Java 2 Enterprise Edition) — (http://java.sun.com/j2ee)	2-12
2.3.3	Microsoft's Dot Net (.NET) (http://msdn.microsoft.com).	2-13
2.3.4	Examples of J2EE, .NET and Web Services Configurations	2-14
2.3.5	Combining XML Web Services with J2EE and .NET	2-16
2.4	HOW TO BUILD COMPONENT-BASED APPLICATION ARCHITECTURES	2-17
2.4.1	Overview of Approach	2-17
2.4.2	Model-Driven Architecture from the Object Management Group (OMG)	2-18

	2.4.3	Organizational Notes	2-20
2.5		STEP 1: DEFINE/REFINE THE COMPONENT OBJECT MODEL	2-22
	2.5.1	Build/refine an object model	2-22
	2.5.2	Identify Components (Primitive and Business Components)	2-23
2.6		STEP 2: SEPARATE CONCERNS INTO LOGICAL TIERS (TECHNOLOGY-INDEPENDENT MODEL)	2-24
2.7		STEP 3: DECOMPOSE APPLICATION INTO PHYSICAL HARDWARE TIERS	2-26
	2.7.1	Single-Hardware Tiered Application Architectures	2-27
	2.7.2	Two-Tiered Application Architectures	2-29
	2.7.3	Three-Tiered Application Architectures	2-31
	2.7.4	Choosing Number of Tiers - The "Tiering Debate"	2-33
2.8		STEP 4: CHOOSE THE IT INFRASTRUCTURE AND BUILD A TECHNOLOGY-SPECIFIC MODEL	2-35
	2.8.1	General Infrastructure Considerations	2-38
	2.8.2	Evaluate General-Purpose Middleware Services	2-41
	2.8.3	Evaluate Specialized Services and Application Servers for Mobile and EC/EB Applications	2-42
	2.8.4	Evaluate Management and Support Services	2-43
	2.8.5	Analyze Network Support	2-45
	2.8.6	Understand Operating System Support	2-46
	2.8.7	Keep Business Reality in Mind	2-46
2.9		STEP 5: PERFORMANCE ANALYSIS AND ALLOCATION STRATEGIES	2-46
	2.9.1	Overview	2-46
2.10		EXAMPLE OF A COMPONENTS-BASED ARCHITECTURE	2-49
	2.10.1	Overview	2-49
	2.10.2	A General Component-based Architecture	2-50
	2.10.3	Designing Components for IPurchase	2-50
	2.10.4	Implementing components	2-52
	2.10.5	Deploying Components	2-53
2.11		SUMMARY	2-53
2.12		CASE STUDY: APPLICATION SOFTWARE ARCHITECTURES FOR XYZCORP	2-53
2.12.1		Hints About The Case Study	2-54
2.13		REVIEW PROBLEMS AND EXERCISES	2-55
2.14		ADDITIONAL INFORMATION	2-55

3 ENTERPRISE DATA (INFORMATION) ARCHITECTURES IN WEB-XML ENVIRONMENTS 3-1

3.1		INTRODUCTION	3-2
3.2		CONCEPTS AND DEFINITIONS	3-3
	3.2.1	Enterprise (Corporate) Data	3-3
	3.2.2	Role of Web-XML Data	3-5
	3.2.3	Data Life Cycle	3-6
	3.2.4	Data Architecture	3-7
3.3		STEP 1: INFORMATION REQUIREMENT DEFINITIONS	3-11
3.4		STEP 2: DATA MODELING	3-12
	3.4.1	Overview of Data Modeling	3-12
	3.4.2	Modeling of XML Data	3-13
3.5		STEP 3: LOGICAL DATABASE DESIGN	3-16
3.6		STEP 4: DATA PARTITIONING AND CLUSTERING	3-17
	3.6.1	Overview	3-17
	3.6.2	Data Partitioning (Fragmentation)	3-18
	3.6.3	Clustering	3-19
	3.6.4	Example of Partitioning (Fragmentation) and Clustering	3-20
3.7		STEP 5: DATA ALLOCATION STRATEGIES	3-21
	3.7.1	Overview	3-21

3.7.2	Trade-offs in Data Duplication	3-21
3.7.3	Intuitive Data Allocation Analysis	3-23
3.7.4	Analytical Data Allocation	3-25
3.8	STEP 6: DATABASE CONNECTIVITY AND INTEROPERABILITY - DEALING WITH WEB AND XML	3-26
3.8.1	Data Connectivity Strategies	3-27
3.8.2	XML Data Access	3-28
3.8.3	Data Inter-operability	3-31
3.9	STATE OF THE PRACTICE: A DETAILED EXAMPLE	3-32
3.9.1	Step 1: Information Requirements	3-33
3.9.2	Step 2: Data Modeling	3-34
3.9.3	Step 3: Logical Database Design	3-34
3.9.4	Step 4: Fragmentation and Clustering	3-35
3.9.5	Step 5: Data Allocation	3-36
3.9.6	Step 6: Database Connectivity and Inter-operability	3-38
3.10	SUMMARY	3-39
3.11	CASE STUDY: ENTERPRISE DATA ARCHITECTURE FOR XYZCORP	3-40
3.12	REVIEW QUESTIONS AND EXERCISES	3-41
3.13	APPENDIX 3A: TWO ANALYTICAL DATA ALLOCATION METHODS	3-42
3.13.1	Non-Redundant Best Fit Data Allocation Method	3-42
3.13.2	The Redundant Data Allocation Method	3-44
3.14	ADDITIONAL INFORMATION	3-46

4 ARCHITECTURE IMPLEMENTATION -- CONCEPTS AND EXAMPLES

4-1		
4.1	INTRODUCTION	4-2
4.2	IMPLEMENTATION CONCEPTS	4-3
4.2.1	Overview	4-3
4.2.2	Key Application Implementation Considerations	4-4
4.2.3	Implementation Approach	4-7
4.3	A SAMPLE APPLICATION	4-7
4.5	SIMPLE WEB CLIENT-SIDE APPLICATIONS	4-8
4.5.1	Overview	4-8
4.5.2	HTML and XML Based Applications	4-9
4.5.3	Java Applet-Based Applications	4-12
4.5.4	Building Wrappers -- General Considerations	4-15
4.5.5	PowerBuilder for Developing Web-client Applications	4-16
4.6	WEB-TIER APPLICATIONS USING CGI, SERVLETS AND JSPS	4-18
4.6.1	CGI-Based Application	4-18
4.6.2	Implementation by using Servlets	4-20
4.6.3	Implementation by Using Java Server Pages (JSPs)	4-22
4.7	OCSI APPLICATION IMPLEMENTATION: GENERAL CONCEPTS	4-24
4.7.1	Overview	4-24
4.7.2	Step 1: Detailed Design	4-24
4.7.3	Step 2: Create Interface Definitions	4-25
4.7.4	Step 3: Build Server Programs	4-29
4.7.5	Step 4: Build Client Program(s)	4-30
4.7.6	Step 5: Testing	4-31
4.8	WEB-BASED DISTRIBUTED OBJECT APPLICATIONS WITH JAVA AND CORBA/DCOM	4-32
4.8.1	Overview	4-32
4.8.2	Web-CORBA Applications	4-33
4.8.3	Activex for Developing Web Applications	4-42
4.9	EJBS (ENTERPRISE JAVA BEANS) TO BUILD ENTERPRISE WIDE COMPONENT-BASED APPLICATIONS	4-43

	4.9.1	Overview	4-43
	4.9.2	Customer Example	4-44
4.10		XML WEB SERVICES AND SOAP/XML PROCESSING	4-48
	4.10.1	Overview	4-48
	4.10.2	SOAP Example	4-48
	4.10.3	The SOAP Message Exchange Model	4-49
	4.10.4	SOAP Messages - Envelopes, Headers and Body	4-50
	4.10.5	SOAP Exchange Protocols	4-51
4.11		TRANSACTION PROCESSING FOR OCSI APPLICATIONS	4-52
	4.11.1	Overview	4-52
	4.11.2	Construct a Transaction Model	4-52
	4.11.3	Create Interface Definitions	4-53
	4.11.4	Build an Encina Server	4-54
	4.11.5	Build an Encina Client	4-56
	4.11.6	Deploy Application	4-58
4.12		SUMMARY	4-59
4.13		CASE STUDY: XYZCORP IMPLEMENTS WEB-BASED SYSTEMS	4-59
	4.13.1	Hints About The Case Study	4-59
	4.14	REVIEW QUESTIONS AND EXERCISES	4-60
4.15		ADDITIONAL INFORMATION	4-60

5 ARCHITECTURE STATE OF THE PRACTICE, MARKET, AND ART 5-1

5.1		INTRODUCTION	5-1
5.2		STATE OF THE PRACTICE	5-2
	5.2.1	General Observations	5-2
	5.2.2	A Generic Architecture View	5-2
	5.2.3	Short Case Studies ("Snippets")	5-3
	5.2.4	Short Case Studies ("Snippets")	5-4
	5.2.5	J. Crew Uses J2EE	5-5
	5.2.6	H&R Block Uses .NET Enterprise Servers	5-5
	5.2.7	Cisco IPC Architecture	5-6
	5.2.8	The Cortex Project -- Using Web Services at TransCanada Pipelines	5-7
	5.2.9	Famous Footware Data Architecture	5-8
	5.2.10	Using Business Objects to Architect Multi-Dimensional CRMs -- A Detailed Case Study	5-9
	5.2.11	Design for Homes Website	5-10
	5.2.12	Honeywell Uses EJBs	5-11
	5.2.13	Zagat Survey Uses XML Web services	5-12
	5.2.14	Hyatt's Three-Tiered Sales System	5-12
5.3		STATE OF THE MARKET -- COMMERCIALLY AVAILABLE PRODUCTS	5-12
	5.3.1	General Observations	5-12
	5.3.2	Application Architecture State of the Market	5-13
	5.3.3	Data Architecture State of the Market	5-14
	5.3.4	Architecture Implementation State of the Market	5-14
5.4		STATE OF THE ART: STANDARDS, TRENDS, AND RESEARCH NOTES	5-14
	5.4.1	General Trends and Standards	5-14
	5.4.2	EB Application Engineering and Architectures -- Research Notes	5-16
	5.4.3	Data Architectures -- Research Notes and Trends	5-18
	5.4.4	Model-Driven Architecture (MDA) -- A Future Architectural Vision	5-19
5.5		EXERCISES	5-21

MODULE INDEX

MODULE (INTEGRATION): Application Integration and Migration

1 INTEGRATION WITH EXISTING (INCLUDING LEGACY) APPLICATIONS --

AN OVERVIEW 1-1

- 1.1 INTRODUCTION 1-2
- 1.2 APPLICATION INTEGRATION: CONCEPTS AND DEFINITIONS 1-4
 - 1.2.1 What is Application Integration? 1-4
 - 1.2.2 Why Integrate? Promises and Pitfalls 1-6
 - 1.2.3 Good versus Bad Integrations – Some Guidelines 1-8
 - 1.2.4 Application Integration – The Basic Models 1-10
 - 1.2.5 A Broader Framework for integration 1-14
- 1.3 INTEGRATION OF ENTERPRISE APPLICATIONS -- GENERAL CONSIDERATIONS 1-16
 - 1.3.1 Integration of Enterprise (Internal, Back-office) Applications 1-16
 - 1.3.2 Integration of B2B Applications 1-18
 - 1.3.3 Integration of Legacy Applications 1-19
- 1.4 APPLICATION INTEGRATION ARCHITECTURES - A QUICK LOOK 1-22
 - 1.4.1 Overview 1-22
 - 1.4.2 Application Integration Issues 1-22
 - 1.4.3 Integrated Architectures by Using EAI (Enterprise Application Integration) Platforms 1-24
 - 1.4.4 Web Services as EAI Platforms 1-26
- 1.5 INTEGRATING WITH LEGACY APPLICATIONS -- A CLOSER LOOK 1-27
 - 1.5.1 Issues with Integrating Legacy Applications 1-27
 - 1.5.2 Categories of Legacy Applications 1-29
 - 1.5.3 Overview of Strategies to Integrate Legacy Applications 1-31
 - 1.5.4 Strategy 1: Ignore the Legacy Applications 1-34
 - 1.5.5 Strategy 2: Rewrite From Scratch (Cold Turkey) 1-34
 - 1.5.6 Strategy 3: Access/Integration in Place 1-34
 - 1.5.7 Strategy 4: Data Warehousing 1-35
 - 1.5.8 Strategy 5: Gradual Migration 1-36
- 1.6 PLANNING FOR APPLICATION INTEGRATION 1-38
 - 1.6.1 Overview 1-38
 - 1.6.2 Opportunity Analysis 1-39
 - 1.6.3 Choose a Solution Architecture 1-40
 - 1.6.4 Implementation Considerations 1-41
 - 1.6.5 Cost/benefit Analysis 1-41
 - 1.6.6 Justification and Scheduling 1-42
- 1.7 STATE OF THE PRACTICE: CASE STUDIES 1-43
 - 1.7.1 Short Examples of Application Integration 1-44
 - 1.7.2 Application Integration Success and Failures 1-44
 - 1.7.3 Off-Shore Reengineering of legacy Applications 1-46
 - 1.7.4 Hewlett Packard's Migration to Client/Server Architecture 1-47
- 1.8 STATE OF THE MARKET: REENGINEERING TOOLS 1-49
- 1.9 STATE OF THE ART: RESEARCH NOTES 1-49
- 1.10 SUMMARY 1-50
- 1.11 CASE STUDY: XYZCORP EMBARKS ON APPLICATION INTEGRATION AND MIGRATION 1-50
 - 1.11.1 Overall Integration Strategy Project 1-50
 - 1.11.2 Hints About The Case Study 1-51
- 1.12 REVIEW QUESTIONS AND EXERCISES 1-52

1.13 ADDITIONAL INFORMATION 1-52

2 ENTERPRISE AND INTER-ENTERPRISE APPLICATION INTEGRATION

(EAI/EAI) 2-1

2.1	INTRODUCTION	2-2
2.2	APPLICATION INTEGRATION CONCEPTS	2-4
2.2.1	Application Integration - Revisited	2-4
2.2.2	Categories of Applications - An Integrator's View	2-5
2.2.3	Integration Technologies Overview	2-6
2.2.4	EAI versus eAI -- Big "E" versus Little "e"	2-7
2.3	AN INTEGRATION EXAMPLE	2-8
2.4	INTEGRATION TECHNOLOGIES AND ARCHITECTURES -- A CLOSER LOOK	2-12
2.4.1	Overview	2-12
2.4.2	Application Connectivity for Enterprise Portals: Types of Connection for eAI Lite	2-14
2.4.3	Application Connectivity: Connectivity Models for eAI Lite	2-22
2.4.4	Information Transformation - eAI Mid	2-25
2.4.5	Process and Workflow Management -- eAI Heavy	2-28
2.4.6	B2B Process Management -- eAI Superheavy	2-29
2.5	B2B INTEGRATION -- A CLOSER LOOK	2-31
2.5.1	B2B Integration for B2B e-Commerce	2-31
2.5.2	B2B Integration Solution Components	2-32
2.5.3	B2B Integration Summary	2-36
2.6	EAI PLATFORMS - A QUICK REVIEW	2-36
2.6.1	Overview	2-36
2.6.2	eAI Platform for Enterprise Applications -- State of the Market	2-37
2.6.3	B2B Application Integration Platforms -- State of the Market	2-40
2.6.4	Web Services as EAI Platforms	2-41
2.7	STATE OF THE PRACTICE: EXAMPLES OF E-BUSINESS APPLICATION INTEGRATION	2-43
2.7.1	Overview	2-43
2.7.2	Example 1: EAI-Lite -- Integrating a Few "Friendly" Applications	2-44
2.7.3	Example 2: eAI Mid -- Integrating Few "Hostile" (Legacy) Applications	2-46
2.7.4	Example 3: eAI Heavy -- Enterprise Application Integration	2-48
2.7.5	Example 4: eAI SuperHeavy -- Application Integration in Trading Networks	2-50
2.8	A METHODOLOGY FOR APPLICATION INTEGRATION	2-51
2.8.1	Step 1: Integration Requirements and Logical Models	2-52
2.8.2	Step 2: Develop Solution Architectures	2-53
2.8.3	Step 3: Implement, Deploy, and Support	2-59
2.8.4	Step 4: Deploy and Support	2-59
2.9	SUMMARY	2-60
2.10	CASE STUDY: ACCESS/INTEGRATION FOR XYZCORP	2-60
2.10.1	Hints About The Case Study	2-60
2.11	PROBLEMS AND EXERCISES	2-61

4 MIGRATION STRATEGIES AND TECHNOLOGIES 4-1

4.1	INTRODUCTION	4-1
4.2	MIGRATION CONCEPTS AND STRATEGIES	4-3

4.2.1	When to Migrate and When Not To	4-3
4.2.2	Minimizing Migrations -- The Model Driven Architecture	4-5
4.2.3	Approaches for Migration	4-6
4.3	USER INTERFACE MIGRATION TO WEB	4-8
4.4	DATA MIGRATION	4-10
4.4.1	Overview	4-10
4.4.2	A Framework for Discussing Data Migration	4-12
4.4.3	Data Migration Technologies	4-14
4.5	COMPLETE APPLICATION MIGRATION -- REPLACING SYSTEMS WITH ERPS	4-19
4.5.1	Overview	4-19
4.5.2	Highly Structured (Decomposable) Application Migration	4-21
4.5.3	Semi-Decomposable (Program Decomposable) Applications	4-22
4.5.4	Unstructured (Monolithic) Applications.	4-23
4.5.5	Migration Gateways - Technologies for Migration	4-23
4.6	SYSTEM MIGRATION - MAINFRAME UNPLUGS	4-25
4.6.1	System Migration Concepts	4-25
4.7	A PROCEDURE FOR MIGRATION	4-27
4.7.1	Step 1: Business Analysis and Migration Planning	4-27
4.7.2	Step 2: Develop and Justify a Migration Architecture	4-28
4.7.3	Step 3: Implementation	4-30
4.7.4	Step 4: Deployment and Support Considerations	4-30
4.8	STATE OF THE PRACTICE: EXAMPLES AND CASE STUDIES	4-31
4.8.1	Short Case Studies (including "Oldies but Goodies")	4-31
4.8.2	A Detailed Example: Migration of a Project Management System	4-32
4.9	STATE OF THE MARKET: PRODUCTS	4-37
4.10	STATE OF THE ART: RESEARCH NOTES	4-38
4.11	SUMMARY	4-38
4.12	CASE STUDY: MIGRATION FOR XYZCORP	4-38
4.13	REVIEW QUESTIONS AND EXERCISES	4-39
4.14	ADDITIONAL INFORMATION	4-39

5 INTEGRATION STATE OF THE PRACTICE, MARKET, AND ART 5-1

5.1	INTRODUCTION	5-1
5.2	STATE OF THE PRACTICE -- CASE STUDIES	5-2
5.2.1	Commonwealth Bank and Colonial Limited Merger	5-2
5.2.2	Owens-Corning Deploys ERPs for Integration	5-3
5.2.3	Nestlé USA - ERP Implementation Gets Into Trouble	5-4
5.2.4	Verizon Uses Seibel for Integration	5-6
5.2.5	Elf Atochem North America -- ERP Implementation Success	5-7
5.2.6	Deutsche Bank Uses Vitria eAI Platform	5-8
5.2.7	Telia Uses TIBCO eAI Platform	5-8
5.2.8	U.S. Army Supports Blackhawk Helicopters with webMethods eAI	5-9
5.2.9	Real-Time Business Activity Monitoring for Real-Time Enterprises -- Snippets	5-9
5.2.10	Host integration -- Hewitt Associates LLC	5-10
5.2.11	XML Connector Integrates XML Data with the Enterprise	5-11
5.2.12	Mobility for Ontario Government -- Integration of Wireless Services	5-11
5.2.13	Conversion of an Asset Management Program	5-12
5.2.14	VOLKSWAGEN Group Japan Enhances Dealer Relations with IBM Solution	5-13
5.2.15	Banc One's Transition to Data Warehousing	5-13
5.2.16	BlueCross BlueShield of Tennessee Does Strategic Business Process Integration	5-15
5.2.17	UK's Clear Makes One-Stop Online Bill Payment a Reality	5-15
5.2.18	Credit Lyonnais Streamlines Capital Market Operations	5-15
5.3	STATE OF THE MARKET	5-15
5.3.1	Integration Platforms State of the Market	5-16
5.3.2	Data Warehouses and Data Mining State of the Market	5-17

	5.3.3	Migration State of the Market	5-17	
5.4		STATE OF THE ART: TRENDS AND RESEARCH NOTES	5-18	
	5.4.1	General Trends	5-18	
	5.4.2	Integration for Real-time Enterprises and “Extreme Integration”	5-19	
5.5		EXERCISES	5-20	

MODULE INDEX

ENABLING IT INFRASTRUCTURE (NETWORKS AND MIDDLEWARE)

MODULE (NETWORKS): Network Services and Architectures in the Internet World

1	COMMUNICATION NETWORK PRINCIPLES	1-1
1.1	INTRODUCTION	1-2
1.2	PHYSICAL COMMUNICATION CHARACTERISTICS	1-5
	1.2.1 Basic Terms and Definitions	1-5
	1.2.2 Digital to Analog Conversion: Modems and Interfacing Devices	1-7
1.3	DIGITAL COMMUNICATION NETWORKS	1-8
	1.3.1 Analog Versus Digital Communications	1-8
	1.3.2 Digitizing Techniques and Codecs	1-10
	1.3.3 T Carriers (T1, T2, T3, T4 Lines)	1-12
1.4	COMMUNICATION MEDIA CHARACTERISTICS	1-13
1.5	TOPOLOGIES, COMPRESSION, AND ENCRYPTION	1-15
	1.5.1 Network Layout and Topologies	1-15
	1.5.2 Asynchronous Versus Synchronous Transmission and Full/Half Duplex	1-16
	1.5.3 Data Encryption and Compression Techniques	1-17
1.6	LOCAL AREA NETWORKS	1-19
	1.6.1 Overview	1-19
	1.6.2 Link Control Protocols for LANs (Ethernet and Token Passing)	1-22
	1.6.3 LAN Standards -- The IEEE 802 Family	1-25
	1.6.4 Shared Versus Switched LANs	1-26
	1.6.5 Virtual LANs (VLANs)	1-28
	1.6.6 Examples of LANs	1-28
	1.6.7 Gigabit Ethernet LANs	1-33
	1.6.8 Issues in LAN Selection and Design	1-33
1.7	WIDE AREA NETWORKS	1-36
	1.7.1 Telecommunications Overview	1-36
	1.7.2 WAN Components	1-37
	1.7.3 Switching Systems (Circuit and Packet Switching)	1-39
	1.7.4 WAN Design Issues	1-41
1.8	METROPOLITAN AREA NETWORKS	1-43
	1.8.1 Overview	1-43
	1.8.2 Fiber Optic MANs/LANs and FDDI	1-43
1.9	ISDN AND BROADBAND ISDN	1-47
	1.9.1 ISDN Overview	1-47
	1.9.2 ISDN Applications	1-48
	1.9.3 ISDN Architecture	1-48
1.10	CHAPTER SUMMARY	1-50
1.11	REVIEW QUESTIONS AND EXERCISES	1-51
1.12	CASE STUDY: NETWORK TECHNOLOGIES AT XYZCORP	1-52
	1.12.1 Project A: Wide Area Network Design	1-52
	1.12.2 PROJECT B: Local Network Selection	1-53
1.13	HINTS ABOUT THE CASE STUDY	1-55
	1.13.1 Project A: WAN Design	1-55
	1.13.2 Project B: LAN Design	1-55
1.14	ADDITIONAL INFORMATION	1-56

2 NETWORKS ARCHITECTURES AND CONNECTIVITY 2-1

2.1	INTRODUCTION	2-2
2.2	OVERVIEW OF NETWORK ARCHITECTURE STANDARDS	2-3
2.2.1	Definitions and Background	2-3
2.2.2	Motivation for Network Architecture Standards	2-5
2.2.3	Good versus Bad Architectures – Some Guidelines	2-5
2.2.4	Network Standardization Bodies	2-6
2.3	THE OPEN SYSTEM INTERCONNECTION (OSI) REFERENCE MODEL	2-7
2.3.1	Overview and Terminology	2-7
2.3.2	OSI Layers	2-11
2.3.3	Information Flow in the OSI Model: An Example	2-14
2.3.4	Protocol Overview	2-16
2.4	ENTERPRISE NETWORKS – THE REALITY CHECK	2-17
2.4.1	Overview	2-17
2.4.2	Transmission Control Program/Internet Protocol (TCP/IP) Stack	2-18
2.4.3	IBM's System Network Architecture (SNA)	2-20
2.4.4	LAN Network Stacks and Network Operating Systems	2-22
2.4.5	Telephony (SS7) Networks	2-24
2.4.6	Analysis and Comparison of Network Stacks	2-26
2.5	NETWORK INTERCONNECTIVITY (ROUTERS, BRIDGES, GATEWAYS)	2-27
2.5.1	Repeaters	2-28
2.5.2	Bridges	2-28
2.5.3	Routers and Firewalls	2-28
2.5.4	Network Gateways	2-31
2.6	EXAMPLE OF A NETWORK: FORDHAM UNIVERSITY NETWORK	2-33
2.7	NETWORK PERFORMANCE OVERVIEW	2-34
2.7.1	Response Time Performance	2-34
2.7.2	Network Availability	2-40
2.8	THE TELECOMMUNICATIONS BUSINESS - A QUICK SCAN	2-42
2.8.1	Overview	2-42
2.8.2	Physical Network Element Providers	2-44
2.8.3	Public Switched Telephone Network (PSTN) Providers	2-44
2.8.4	Telephony Applications and Operations Business	2-44
2.8.5	Data Network Routing Business	2-44
2.8.6	Network Consulting and Engineering Business	2-45
2.8.7	Network Integration Business	2-45
2.8.8	Bandwidth Trading Business	2-45
2.8.9	Network Management Business	2-46
2.9	CASE STUDY: XYZCORP ESTABLISHES A NETWORK ARCHITECTURE FOR ITS INTRANET	2-46
2.9.1	Problem Overview	2-46
2.9.2	Hints about the Case Study	2-46
2.10	SUMMARY	2-48
2.11	REVIEW QUESTIONS AND EXERCISES	2-50
2.12	ADDITIONAL INFORMATION	2-50
2.13	ATTACHMENT A: PRINCIPLES OF COMMUNICATIONS PROTOCOLS	2-51
2.13.1	Classification of Protocols	2-51
2.13.2	Generic Protocols	2-53
2.13.3	Connection-Based and Connectionless Protocols	2-55
2.13.4	Protocol Efficiency	2-55
2.14	ATTACHMENT B: SNA APPC AND LU6.2	2-56

3 WIRELESS AND BROADBAND NETWORKS -- NEXT GENERATION

NETWORKS 3-1

- 3.1 INTRODUCTION 3-2
- 3.2 NEXT GENERATION NETWORKS (NGNS) 3-3
- 3.3 HIGH DATA RATE ACCESS FROM HOME -- THE RESIDENTIAL BROADBAND 3-6

MODULE INDEX

MODULE (MIDDLEWARE): Application Interconnectivity Through Middleware

1 MIDDLEWARE PRINCIPLES AND BASIC MIDDLEWARE SERVICES 1-1

1.1	INTRODUCTION	1-2
1.2	CASE STUDY: XYZCORP CHOOSES AN INTERCONNECTIVITY ARCHITECTURE	1-3
1.2.1	Middleware for Interconnectivity Project	1-3
1.3	APPLICATIONS IN DISTRIBUTED ENVIRONMENTS	1-4
1.4	MIDDLEWARE -- THE GLUE BETWEEN APPLICATIONS	1-5
1.4.1	What is Middleware?	1-5
1.4.2	Functional View of Middleware	1-7
1.5	MIDDLEWARE EXAMPLES AND A CLOSER LOOK	1-10
1.6	THE CLIENT/SERVER MODEL – A CLOSER LOOK	1-12
1.6.1	Overview of Client/Server Model	1-12
1.6.2	Architectural Configurations of C/S Systems	1-13
1.7	PUTTING THE PIECES TOGETHER	1-16
1.8	XYZCORP CASE STUDY: PARTIAL SOLUTION 1	1-18
1.8.1	High Level XYZCorp Application Interconnectivity Architecture	1-18
1.8.2	Business Reporting System	1-19
1.9	BASIC MIDDLEWARE -- A CLOSER LOOK	1-21
1.10	CONNECTING TO REMOTE PROGRAMS - REMOTE PROCEDURE CALL (RPC)	1-23

1.10.1	Overview	1-23
1.10.2	The RPC Paradigm	1-23
1.10.3	RPC Analysis	1-25
1.10.4	Strengths and Weaknesses of RPC	1-26
1.11	ACCESSING REMOTE DATABASES DIRECTLY - REMOTE DATA ACCESS (RDA)	1-27
1.11.1	Overview	1-27
1.11.2	RDA Paradigm	1-27
1.11.3	RDA Analysis	1-28
1.11.4	Strengths and Weaknesses of RDA	1-30
1.12	LOOSE COUPLING BETWEEN APPLICATIONS -- MESSAGE ORIENTED MIDDLEWARE (MOM)	1-30
1.12.1	Overview	1-30
1.12.2	MOM with Message Queuing Paradigm	1-32
1.12.3	QMP Analysis	1-34
1.12.4	Strengths and Weaknesses	1-34
1.13	PUSHING INFORMATION TO CONSUMERS -- PUBLISH-SUBSCRIBE MODEL	1-35
1.13.1	Overview	1-35
1.13.2	Publish/Subscribe Model	1-36
1.13.3	Publish-Subscribe Analysis	1-37
1.13.4	Strengths and Weaknesses	1-37
1.14	THE JMS STANDARD -- COMBINING MESSAGING INTO ONE	1-38
1.15	OTHER INTERACTION PARADIGMS	1-39
1.16	COMPARISON AND ANALYSIS	1-40
1.17	XYZCORP CASE STUDY: PARTIAL SOLUTION 2	1-41
1.18	STATE OF THE PRACTICE, MARKET, AND ART1	1-42
1.19	SUMMARY	1-43
1.20	REVIEW QUESTIONS AND EXERCISES	1-43
1.21	ADDITIONAL INFORMATION	1-44

2 WEB, XML, SEMANTIC WEB, AND WEB SERVICES 2-1

2.1	INTRODUCTION	2-2
2.2	CASE STUDY: WEB PORTAL FOR XYZCORP	2-4
2.3	INTERNET AND INTRANETS: A QUICK REFRESHER	2-4
2.4	OVERVIEW OF WORLD WIDE WEB	2-8
2.4.1	Brief History	2-8
2.4.2	World Wide Web Technologies – The First Generation	2-9
2.4.3	A Simple Example	2-12
2.4.4	Evolution of Web Technologies – The Next Generation Web	2-12
2.5	HYPERTEXT MARKUP LANGUAGE (HTML)	2-14
2.6	WEB BROWSERS	2-17
2.6.1	Overview	2-17
2.6.2	Highlights of Browser Capabilities	2-18
2.6.3	Browsers as Web Clients	2-19
2.7	WEB SITES AND WEB SERVERS	2-20
2.7.1	Overview	2-20
2.7.2	Web Server Architectures	2-21
2.7.3	Web Server Security	2-22
2.8	WEB GATEWAYS: ACCESSING NON-WEB INFORMATION	2-22
2.8.1	Web Gateway Overview	2-22
2.8.2	Common Gateway Interface (CGI)	2-23
2.8.3	Servlets	2-24
2.8.4	Java Server Pages (JSPs)	2-25
2.8.5	Client-Side Mobile Code Gateways	2-26
2.8.6	Other Gateways	2-27

2.9	HYPERTEXT TRANSFER PROTOCOL (HTTP)	2-27
2.9.1	The Initial Model (HTTP 1.0)	2-28
2.9.2	New Model – HTTP 1.1	2-30
2.10	WEB COOKIES AND WEB PROXIES	2-31
2.10.1	Cookies	2-31
2.10.2	Web Proxies	2-32
2.11	XML (EXTENDED MARKUP LANGUAGE)	2-36
2.11.1	What is XML?	2-36
2.11.2	A Few XML Details	2-39
2.11.3	Why XML is So Popular	2-40
2.11.4	Document Type Declarations (DTD)	2-40
2.11.5	XSL ((XML Stylesheet Language)	2-42
2.11.6	XML Schema	2-43
2.11.7	Other XML Capabilities	2-43
2.12	THE SEMANTIC WEB -- A LOOK AT THE NEXT GENERATION OF WEB	2-44
2.12.1	Overview and Motivation	2-44
2.12.2	Web Metadata and PICS (Platform for Internet Content Selection)	2-45
2.12.3	Resource Definition Framework (RDF)	2-45
2.12.4	Document Object Model (DOM)	2-46
2.13	WEB SERVICES – USING WEB TO BUILD GLOBAL APPLICATIONS	2-49
2.13.1	Overview	2-49
2.13.2	A Quick Example	2-50
2.13.3	Why are XML Web Services Important? What are the Main Activities?	2-51
2.14	XYZCORP CASE STUDY: HINTS AND SUGGESTED SOLUTION	2-52
2.15	SUMMARY	2-54
2.16	PROBLEMS AND EXERCISES	2-55
2.17	ADDITIONAL INFORMATION	2-56
2.18	ATTACHMENT A: JAVA AND JAVA APPLET	2-58
2.18.1	What is Java and Why is it so Hot?	2-58
2.18.2	What is a Java Applet?	2-59

3 DISTRIBUTED OBJECT TECHNOLOGIES: CORBA, WEB SERVICES, J2EE, .NET, SOAP, EJBS 3-1

3.1	INTRODUCTION	3-2
3.2	CASE STUDY: XYZCORP INVESTIGATES DISTRIBUTED OBJECT TECHNOLOGIES	3-4
3.3	DISTRIBUTED OBJECT TECHNOLOGIES OVERVIEW	3-5
3.3.1	Concepts	3-5
3.3.2	Distributed Objects: From CORBA/DCOM to Web Services and J2EE	3-7
3.3.3	Interface Definition Languages (IDLs)	3-9
3.3.4	Components, Business Objects, and Object Frameworks	3-11
3.4	COMMON OBJECT REQUEST BROKER ARCHITECTURE (CORBA)	3-13
3.4.1	Object Management Architecture	3-13
3.4.2	Basic CORBA Concepts	3-16
3.4.3	CORBA Facilities	3-17
3.4.4	Using CORBA – An Example	3-19
3.4.5	Combining CORBA with Web and XML	3-22
3.4.6	CORBA 3.0	3-23
3.4.7	CORBA Summary	3-24
3.5	MICROSOFT'S DCOM (DISTRIBUTED COMPONENT OBJECT MODEL)	3-27
3.5.1	Overview	3-27
3.5.2	DCOM (Distributed Component Object Model) as an ORB	3-27
3.5.3	Web Browsers as Containers of ActiveX Components	3-29
3.5.4	ActiveX Controls -- Building Downloadable Web-based Components	3-29
3.5.5	ActiveX Server	3-30

3.5.6	General Observations and Comments	3-30
3.6	J2EE, .NET, AND WEB SERVICES -- COMPONENT-BASED PLATFORMS	3-32
3.6.1	Sun's J2EE (Java 2 Enterprise Edition) Overview	3-32
3.6.2	Microsoft's Dot Net (.NET) Overview	3-34
3.6.3	XML Web Services - A Revisit	3-37
3.6.4	Combining XML Web Services with J2EE and .NET	3-39
3.6.5	Comparison Between J2EE and .NET	3-41
3.7	SOAP – THE .NET FOUNDATION PROTOCOL	3-43
3.7.1	SOAP (Simple Object Access Protocol) Overview	3-43
3.7.2	Example of SOAP Message	3-44
3.7.3	The SOAP Message Exchange Model	3-45
3.7.4	SOAP Messages - Envelopes, Headers and Body	3-45
3.7.5	SOAP Exchange Protocols	3-46
3.7.6	SOAP Security and Interface with WSDL	3-47
3.7.7	SOAP Summary	3-47
3.8	EJBS (ENTERPRISE JAVA BEANS) -- THE FOUNDATION OF J2EE	3-48
3.8.1	Enterprise Components - The EJB (Enterprise Java Bean) Architectures	3-48
3.8.2	EJB Containers and Servers	3-49
3.8.3	Entity Versus Session Beans -- The Highlights	3-49
3.8.4	An Example	3-50
3.8.5	Design Issues in Building EJB Applications	3-52
3.9	XYZCORP CASE STUDY: HINTS AND PARTIAL SOLUTIONS	3-53
3.10	SUMMARY	3-54
3.11	PROBLEMS AND EXERCISES	3-55
3.12	ADDITIONAL INFORMATION	3-55

4 ENTERPRISE DATA AND TRANSACTION MANAGEMENT 4-1

4.1	INTRODUCTION	4-2
4.2	CASE STUDY: XYZCORP ESTABLISHES A DATA AND TRANSACTION PROCESSING STRATEGY	4-4
4.3	DISTRIBUTED DATA AND TRANSACTION MANAGEMENT CONCEPTS	4-5
4.3.1	Review of Basic Concepts	4-5
4.3.2	Role of Web and XML in Enterprise Data and Transaction Management	4-6
4.3.3	Distribution Data Access Management: What and Why?	4-9
4.3.4	Distributed Data and Transaction Management Overview	4-10
4.4	DISTRIBUTED FILE PROCESSING	4-13
4.5	SINGLE-SITE REMOTE DATABASE ACCESS: THE SIMPLE SQL MIDDLEWARE	4-13
4.5.1	Overview	4-13
4.5.2	SQL Clients	4-14
4.5.3	SQL Servers	4-15
4.5.4	Remote Data Standards: ODBC/JDBC and DRDA	4-16
4.6	DISTRIBUTED QUERY PROCESSING AND DISTRIBUTED DATABASE SERVERS	4-20
4.6.1	Overview	4-20
4.6.2	Distributed Database Servers	4-22
4.6.3	Heterogeneous and Federated Databases in Network Environments	4-23
4.7	WEB-BASED DATA ACCESS	4-25
4.7.1	Web Query Processing and XQL (XML Query Language) -- XML as a Database	4-25
4.7.2	Web Access to Relational Databases - The Web Gateways	4-26
4.8	XYZCORP CASE STUDY: PARTIAL SOLUTION 1	4-30
4.9	DISTRIBUTED TRANSACTION MANAGEMENT -- THE TP-HEAVY APPROACH	4-30
4.9.1	Overview of Transaction Management Concepts	4-30
4.9.2	Distributed Transaction Processing Concepts	4-32
4.9.3	Standards for Distributed Transaction Processing	4-34
4.10	DATA REPLICATION SERVERS -- THE TP-LITE APPROACH	4-36

4.10.1	Overview	4-36
4.10.2	Definitions and Technical Considerations	4-37
4.10.3	General Architecture of Replication Servers	4-39
4.11	TWO -PHASE COMMIT ("TP-HEAVY") VERSUS DATA REPLICATION SERVERS ("TP-LITE")	4-42
4.11.1	Two-Phase Commit	4-43
4.11.2	Trade-offs Between Two Phase Commit and Replication Servers	4-44
4.12	DISTRIBUTED TRANSACTION PROCESSING: TP-LESS, TP-LITE, TP-HEAVY	4-45
4.12.1	TP-Less	4-45
4.12.2	TP-Lite	4-45
4.12.3	TP-Heavy	4-46
4.12.4	Trade-offs Between TP-Lite and TP-Heavy	4-47
4.13	DISTRIBUTED DATA AND TRANSACTION MANAGEMENT: A CONSOLIDATION	4-48
4.13.1	Global Data Definition and Translation Challenges	4-49
4.13.2	Global Directory Allocation (Name Services) Challenges	4-49
4.13.3	Distributed File Processing Challenges	4-50
4.13.4	Distributed Query Processing Challenges	4-50
4.13.5	Distributed Transaction Processing Challenges	4-50
4.14	A DISTRIBUTED DATA AND TRANSACTION MANAGEMENT EVALUATION FRAMEWORK	4-52
4.15	EXAMPLES OF DISTRIBUTED DATA AND TRANSACTION MANAGEMENT	4-54
4.16	STATE OF THE ART: OBJECT-ORIENTATION IN TRANSACTION MANAGEMENT	4-56
4.17	XYZCORP CASE STUDY: PARTIAL SOLUTION 2	4-57
4.18	PROBLEMS AND EXERCISES	4-58
4.19	ADDITIONAL INFORMATION	4-58

5 MIDDLEWARE STATE OF THE PRACTICE, MARKET, AND ART 5-1

5.1	INTRODUCTION	5-1
5.2	STATE OF THE PRACTICE: SHORT CASE STUDIES	5-2
5.2.1	Middleware State of the Practice -- General Observations	5-2
5.2.2	J.D. Edwards Uses Messaging Services	5-3
5.2.3	Web Technologies at Procter and Gamble	5-3
5.2.4	The Chemical Markup Language (CML) -- XML in the Chemical Industry	5-4
5.2.5	Dun & Bradstreet Use of XML -- A Case Study	5-5
5.2.6	Dollar Rent a Car and Trans World Entertainment Corp Use Web-XML	5-7
5.2.7	Distributed Objects Examples -- Short "Snippets"	5-7
5.2.8	Bank Boston: Using Distributed Objects for Software Infrastructure	5-8

MODULE INDEX

MODULE (PLATFORMS): Application servers for Mobile and EC/EB Applications

1 MOBILE COMPUTING PLATFORMS --THE MOBILE APPLICATION

SERVICES 1-1

1.1	INTRODUCTION	1-2
1.1.1	A Framework for Discussing Mobility	1-4
1.2	MOBILE APPLICATIONS AND MOBILE COMMERCE -- OVERVIEW AND EXAMPLES	1-6
1.2.1	Mobile Enterprise Business Applications (MEBAs).	1-7
1.2.2	Mobile Commerce (M-Commerce)	1-7
1.2.3	Voice Commerce (V-Commerce), Positional Commerce (p-commerce) and TV-Commerce (T-Commerce)	1-8
1.3	WIRELESS NETWORKS -- A QUICK OVERVIEW	1-9
1.3.1	Wireless WANs - the Cellular and Cordless Networks	1-10
1.3.2	Evolution of Cellular Networks -- The 3G Networks	1-11
1.3.3	Wireless LANs: IEEE802.11 and Bluetooth	1-13
1.3.4	Summary of Wireless Networks	1-14
1.4	CASE STUDIES AND EXAMPLES OF MOBILITY	1-15
1.4.1	Overview	1-15
1.4.2	Airline Industries	1-15
1.4.3	Financial Industry	1-15
1.4.4	Car Rental Agencies	1-16
1.4.5	Healthcare	1-16
1.4.6	Retail Industries for Online Purchasing	1-16
1.5	MOBILE APPLICATION SERVERS -- CONCEPTS AND EXAMPLES	1-17
1.5.1	Overview	1-17
1.5.2	Conceptual Model of Mobile Application Servers	1-18
1.5.3	Examples of Mobile Application Servers	1-19
1.6	THE WIRELESS APPLICATION PROTOCOL (WAP)	1-20
1.6.1	Overview	1-20
1.6.2	Why WAP is Needed?	1-22
1.6.3	The New WAP -- WAP 2.0	1-23
1.6.4	Wireless Application Environment (WAE)	1-24
1.6.5	Wireless Markup Language (WML)	1-25
1.6.6	WAP Microbrowsers	1-27
1.6.7	WAP Gateway	1-27
1.6.8	WAP Security	1-28
1.6.9	WAP Applications	1-29
1.6.10	Example of WAP and Bluetooth Together	1-30
1.6.11	WAP Summary and Trends	1-30
1.7	OTHER MIDDLEWARE FOR WIRELESS (I-MODE, WIRELESS JAVA, BREW)	1-33
1.7.1	Overview	1-33
1.7.2	i-Mode	1-33
1.7.3	Wireless Java and J2ME (Java 2 Micro Edition)	1-35
1.7.4	QualComm's Binary Runtime Environment for Wireless (BREW)	1-39

	1.7.5	Message Oriented Middleware for Mobility	1-39
1.8		VOICE COMMUNICATIONS -- VOICE BROWSERS AND VOICE XML	1-41
	1.8.1	Overview	1-41
	1.8.2	Voice Browsers	1-42
	1.8.3	VOICE XML	1-43
1.9		MOBILE AGENTS	1-47
	1.9.1	Overview: What are Agents, Intelligent Agents, and Mobile Agents	1-47
	1.9.2	Mobile Agents Versus Client/Server Model	1-48
	1.9.3	Sample Applications of Mobile Agents in Ecommerce	1-49
	1.9.4	Mobile Agent Requirements	1-50
	1.9.5	Existing Mobile Agent Platforms and Architectures	1-51
	1.9.6	Mobile Agent Summary	1-56
1.10		CHAPTER SUMMARY	1-56
1.11		CASE STUDY: XYZCORP INVESTIGATES PLATFORMS FOR MOBILITY AND EC/EB SERVICES	1-56
	1.11.1	Mobile Application Server Project	1-56
1.12		REVIEW QUESTIONS AND EXERCISES	1-57
1.13		ADDITIONAL INFORMATION	1-57

2 E-COMMERCE PLATFORMS FOR C2B TRADE -- THE COMMERCE SERVERS 2-1

2.1		INTRODUCTION	2-2
2.2		INTERNET-BASED PURCHASING OVERVIEW	2-4
	2.2.1	An Example -- Getting Sam Started in e-Commerce	2-6
	2.2.2	A Simple C2B Purchasing Example	2-7
	2.2.3	A Simple B2B Purchase Example	2-9
2.3		C2B E-COMMERCE MIDDLEWARE	2-11
	2.3.1	Extranets and Virtual Private Networks (VPNs) for ECommerce	2-13
	2.3.2	Shopping Carts	2-13
	2.3.3	Catalog Management systems	2-14
	2.3.4	XML for Ecommerce	2-15
	2.3.5	Sample XML Source and DTD for Purchase Order	2-16
	2.3.6	Ecommerce Transaction Processing	2-18
	2.3.7	Electronic Payment Systems -- An Example of Transaction Processing	2-21
2.4		SECURITY FOR E-COMMERCE/E-BUSINESS	2-25
	2.4.1	Overview	2-25
	2.4.2	Overview of Core Security Technologies	2-27
	2.4.3	Information Protection (Privacy and Integrity)	2-28
	2.4.4	Authentication and PKI	2-31
	2.4.5	Authorization and Access Control	2-32
	2.4.6	Accountability and Assurance	2-33
	2.4.7	A Security Example	2-33
	2.4.8	Summary of Security	2-36
2.5		ELECTRONIC COMMERCE PLATFORMS: PACKAGING EC MIDDLEWARE	2-37
	2.5.1	IBM Net.Commerce Technologies and WebShpere	2-38
	2.5.2	Oracle E-Commerce Platform	2-40
	2.5.3	Microsoft Internet Commerce Strategy	2-40
	2.5.4	Netscape EC Servers and the Sun iPlanet Platform	2-41
	2.5.5	Open Market	2-41
	2.5.6	BroadVision	2-42
	2.5.7	Miva Merchant	2-42
2.6		OUTSOURCING CONSIDERATIONS	2-42
	2.6.1	Outsourcing the Web Server	2-42
	2.6.2	Outsourcing the Commerce Server	2-43
	2.6.3	Outsourcing the Payment Systems	2-43

2.6.4	Outsourcing the Merchant Account	2-43
2.6.5	Outsourcing the Payment Authorization and Processing	2-44
2.6.6	Outsourcing the entire Ecommerce Operation (e-Store)	2-44
2.7	CONCLUDING COMMENTS	2-44
2.8	CASE STUDY: ON-LINE PURCHASING FOR XYZCORP	2-45
2.9	REVIEW QUESTIONS AND EXERCISES	2-46
2.10	ADDITIONAL INFORMATION	2-46

3 B2B PLATFORMS AND STANDARDS – THE B2B SERVERS 3-1

3.1	INTRODUCTION	3-2
3.2	B2B DIRECT INTERACTIONS (SUPPLY CHAINS) -- ANOTHER LOOK	3-4
3.2.1	Overview	3-4
3.2.2	Supply Chain Management (SCM) Middleware Services	3-6
3.3	B2B THROUGH INTERMEDIARIES -- ANOTHER LOOK	3-8
3.3.1	Overview	3-8
3.3.2	Middleware for eMarkets	3-9
3.4	MIDDLEWARE TECHNOLOGIES TO SUPPORT B2B COMMERCE - A QUICK OVERVIEW	3-11
3.5	B2B MESSAGE EXCHANGES BETWEEN PARTNERS -- EDI AND XML	3-13
3.5.1	Electronic Data Interchange (EDI)	3-14
3.5.2	XML for e-Commerce	3-16
3.6	B2B MIDDLEWARE NEEDED TO SUPPORT EMARKETS	3-18
3.6.1	Mediators for eMarkets and the Role of XML	3-18
3.6.2	Web Content Development (“Web Farming”)	3-20
3.6.3	Mediating Electronic Product Catalogs	3-22
3.7	B2B EXCHANGES STANDARDS (EBXML, PIPS) -- EFFORTS TOWARDS INTEROPERABILITY	3-25
3.7.1	OASIS, ebXML and UBL	3-25
3.7.2	ebXML -- A Closer Look	3-26
3.7.3	RosettaNet	3-30
3.7.4	CommerceOne and Marketsite.net	3-32
3.7.5	BizTalk.org and XML.Org	3-32
3.8	WORKFLOW MANAGEMENT	3-33
3.8.1	Workflow Concepts	3-33
3.8.2	Workflow Management System—The Middleware to Support Workflow	3-35
3.8.3	Business Process Modeling - Some Details	3-36
3.8.4	The Evolution of Workflow Management Systems	3-38
3.8.5	Workflow Management Products - State of the Market	3-40
3.8.6	IBM’s MQSeries WorkFlow - Example of a Workflow Product	3-41
3.9	ENTERPRISE APPLICATION INTEGRATION (EAI) PLATFORMS	3-44
3.9.1	Overview	3-44
3.9.2	EAI Platform Concepts	3-45
3.9.3	Application Connectivity - The Publish//Subscribe Model	3-47
3.9.4	Information Transformation (Application Adapters and Data Translators)	3-47
3.9.5	Process and Workflow Management	3-48
3.9.6	EAI Platform State of the Market	3-49
3.10	EXAMPLES OF B2B PLATFORMS – THE B2B SERVERS	3-50
3.10.1	Oracle Exchange eMarket Platform	3-50
3.10.2	Hewlett Packard’s e-speak	3-52
3.10.3	Supply Chain Products from i2	3-52
3.10.4	B2B Application Integration Platforms (EAI for B2B)	3-53
3.10.5	MCC’s CMI: Rapid Prototyping of BTB Applications using Dynamic Workflow	3-55
3.11	CONCLUDING COMMENTS	3-56
3.12	CASE STUDY: XYZCORP B2B SERVICES AND PLATFORMS	3-57
3.13	REVIEW QUESTIONS AND EXERCISES	3-58

4 PLATFORMS FOR MULTIMEDIA AND COLLABORATION 4-1

4.1	INTRODUCTION	4-1
4.2	PLATFORMS FOR DISTRIBUTED MULTIMEDIA APPLICATIONS	4-3
4.2.1	Overview	4-3
4.2.2	Multimedia Over the Internet -- The Protocol Stack	4-4
4.2.3	Lower Network Issues to Support Multimedia Applications	4-6
4.2.4	Data Transport Protocols: RTP (Real-time Transport Protocol) and RTCP (Real-Time Control Protocol)	4-8
4.2.5	Session Establishment: RTSP, SIP, and SAP	4-10
4.2.6	Presentation Middleware For Distributed Multimedia Applications	4-12
4.2.7	State of the Practice, Market and Art	4-16
4.3	GROUPWARE AND COLLABORATION SERVERS	4-17
4.3.1	Overview	4-17
4.3.2	Groupware: From Lotus Notes to Groove	4-18
4.3.3	Collaborative Learning in Internet2	4-20
4.3.4	State of the Practice, Market, and Art	4-21
4.4	DISTRIBUTED OPERATING SYSTEMS	4-22
4.4.1	Principles of Distributed Operating Systems	4-22
4.4.2	Distributed Operating System Versus a Network Operating System	4-24
4.4.3	Design Issues in Distributed Operating Systems	4-26
4.4.4	Examples of Distributed Operating Systems	4-31
4.5	APPLICATION SERVERS -- EVOLUTION OF PACKAGING MIDDLEWARE SERVICES	4-32
4.6	THE NEXT GENERATION MIDDLEWARE	4-34
4.7	SUMMARY	4-36
4.8	CASE STUDY: XYZCORP INVESTIGATES EMERGING MIDDLEWARE SERVICES AND PLATFORMS	4-36
4.9	PROBLEMS AND EXERCISES	4-37
4.10	ADDITIONAL INFORMATION	4-38

5 APPLICATION SERVERS STATE OF THE PRACTICE, MARKET, AND ART 5-1

5.1	INTRODUCTION	5-1
5.2	APPLICATION SERVERS -- STATE OF THE PRACTICE CASE STUDIES	5-2
5.2.1	A General Approach for a Small Chain of Stores	5-2
5.2.2	AIRTIS Wireless Traffic and Weather Solution	5-5
5.2.3	Microsoft Application Server at Honeywell	5-6
5.2.4	Telekom Malaysia	5-6
5.2.5	Coca-Cola Integrates Business Processes with BizTalk Server 2000	5-7
5.2.6	A B2B Food Exchange	5-7
5.2.7	Fubon Uses WebSphere	5-8
5.2.8	Party Warehouse Uses Integrated Applications	5-9
5.2.9	Digex Uses MS Commerce Server for Hosted Application Services	5-10
5.3	STATE OF THE MARKET -- COMMERCIAL APPLICATION SERVERS	5-10
5.3.1	Commercial Mobile Application Servers (MASs)	5-11
5.3.2	Commercially Available e-Commerce Servers	5-11
5.3.3	Commercially Available B2B Servers	5-12
5.4	STATE OF THE ART -- APPLICATION SERVER EVOLUTION AND TRENDS	5-12
5.4.1	Overview	5-12
5.4.2	Evolution of Application Servers	5-12
5.4.3	Super Application Servers	5-14
5.4.4	Examples of Super Application Servers	5-17

5.4.5	Summary and Trends of Application Servers	5-20
5.5	EXERCISES	5-22

MODULE INDEX

MODULE (MANAGEMENT): Management and Security of e-Business

1 E-BUSINESS MANAGEMENT IN PRACTICE 1-1

1.1	INTRODUCTION	1-2
1.2	STRATEGIC ISSUES IN E-BUSINESS MANAGEMENT – AN OVERVIEW	1-3
1.3	IS PLANNING IN MODERN ENTERPRISES	1-6
1.3.1	Overview of Planning in Enterprises	1-6
1.3.2	The Planning Process	1-7
1.3.3	Business Strategic Planning	1-9
1.3.4	Information Systems Strategic Planning	1-10
1.3.5	IT Infrastructure Planning	1-15
1.3.6	Resource and Cost Estimation/Evaluation	1-18
1.4	ORGANIZATIONAL STRUCTURES AND CENTRALIZATION/DECENTRALIZATION	1-19
1.4.1	Overview of Organizational Structure Design	1-19
1.4.2	Organizational Design in Real-Time Enterprises	1-23
1.4.3	Centralization/Decentralization Debate	1-24
1.4.4	Interdependency Management in e-Business Environments	1-29
1.4.5	Impact on Management Roles	1-30
1.5	DEVELOPMENT, DEPLOYMENT AND STAFFING FOR SUCCESS	1-33
1.5.1	Overview	1-33
1.5.2	Development and Deployment of Distributed Applications	1-34
1.5.3	Acquisition and Installation of Enabling IT Infrastructure	1-35
1.5.4	Outsourcing the IT Infrastructure	1-36
1.5.5	Staffing Considerations	1-38
1.5.6	Training Considerations	1-40
1.6	MONITORING AND CONTROL OF IT ASSETS	1-42
1.6.1	Overview	1-42
1.6.2	Monitoring and Control Functions: Faults, Security and Performance	1-43
1.6.3	Management Platforms -- Technologies to Manage Technologies	1-44
1.6.4	Customer Contact and Operational Support	1-45
1.7	AN EXAMPLE: MANAGEMENT AND SUPPORT FOR XYZCORP	1-46
1.7.1	Example of Information System Plan	1-47
1.7.2	Example of Organization Structure Design	1-49
1.7.3	A Deployment and Support Program	1-51
1.8	MANAGEMENT SUMMARY AND TRENDS	1-52
1.9	REVIEW QUESTIONS AND EXERCISES	1-53
1.10	REFERENCES	1-53

2 MANAGEMENT PLATFORMS FOR NETWORK AND SYSTEMS

MANAGEMENT 2-1

2.1	INTRODUCTION	2-2
2.2	MANAGEMENT PLATFORM CONCEPTS	2-3
2.2.1	Conceptual Overview	2-3
2.2.2	Fault Management Overview	2-5
2.2.3	Performance Management Overview	2-5
2.2.4	Security Management Overview	2-6

2.2.5	Accounting Management Overview	2-7
2.2.6	Configuration Management Overview	2-7
2.2.7	Management Platform High Level Architecture	2-8
2.2.8	Organizational and Support Considerations	2-10
2.3	NETWORK MANAGEMENT PLATFORMS -- THE STARTING POINT	2-12
2.3.1	Overview	2-12
2.3.2	Historical Developments in Network Management	2-13
2.3.3	TCP/IP Network Management: Simple Network Management Protocol (SNMP)	2-15
2.3.4	OSI/ISO Network Management Standard: CMIS/CMIP	2-18
2.4	ENTERPRISE NETWORK MANAGEMENT SYSTEMS	2-23
2.4.1	LAN and VLAN Network Management Systems	2-24
2.4.2	Wireless Network Management	2-25
2.4.3	SNA Network Management: NetView	2-29
2.4.4	Enterprise Network Management -- Putting the Pieces Together	2-29
2.5	SYSTEMS MANAGEMENT -- GOING BEYOND NETWORK MANAGEMENT	2-31
2.5.1	Overview	2-31
2.5.2	Distributed Applications Management	2-33
2.5.3	Middleware Management	2-34
2.6	EXAMPLE OF SYSTEMS MANAGEMENT -- THE TELECOM OPERATION SUPPORT SYSTEMS (OSS)	2-35
2.6.1	Overview	2-35
2.6.2	Telecom Services at a Glance	2-36
2.6.3	The Telecommunications Management Network (TMN) Model	2-37
2.6.4	OSS Configurations and Examples	2-38
2.7	EXAMPLES OF MANAGEMENT PLATFORMS	2-41
2.7.1	Overview	2-41
2.7.2	Initial Effort -- OSF Distributed Management Environment (DME)	2-42
2.7.3	IBM Tivoli (www.tivoli.com)	2-44
2.7.4	HP Openview (http://www.openview.hp.com/)	2-45
2.7.5	Computer Associates Unicenter (http://www3.ca.com/Solutions/)	2-45
2.7.6	BMC Patrol (http://www.bmc.com/)	2-45
2.7.7	Technology Applications in Management Platforms	2-45
2.8	CASE STUDY -- MANAGING A VIDEO ON DEMAND SYSTEM	2-46
2.9	CHAPTER SUMMARY	2-49
2.10	REVIEW QUESTIONS AND EXERCISES	2-50
2.11	CASE STUDY: NETWORK MANAGEMENT FOR XYZCORP	2-50
2.12	REFERENCES	2-51

3 SECURITY MANAGEMENT: APPROACHES AND TECHNOLOGIES 3-1

3.1	INTRODUCTION	3-2
3.2	SHORT CASE STUDIES -- PROTECTING THE IT ASSETS FROM INTERNAL ATTACKS	3-4
3.2.1	Global Retailer	3-4
3.2.2	FBI	3-5
3.2.3	Verizon	3-6
3.2.4	Ethical and Organizational Issues in these Cases	3-6
3.3	DEFINITIONS AND CONCEPTS	3-6
3.3.1	Overview	3-6
3.3.2	Evolution of Security -- The DARPA View	3-7
3.3.3	Security at Various Layers -- A Quick Glance	3-8
3.3.4	Security Design -- Sneak Preview	3-9
3.4	ESTABLISHING SECURITY REQUIREMENTS	3-10
3.4.1	External Factors that Drive Security Requirements	3-10
3.4.2	Organizational Requirements	3-10
3.4.3	Protection Policies	3-10

3.5	MANAGEMENT ISSUES IN SECURITY	3-12
3.5.1	Overview	3-12
3.5.2	Organizing for Security: Roles and Responsibilities	3-13
3.5.3	Security Awareness	3-13
3.5.4	Security Training	3-14
3.5.5	The Role of Organizational Computing Models	3-14
3.5.6	Risk Management	3-15
3.5.7	Security Trust Models	3-16
3.6	BASIC CRYPTOGRAPHY	3-18
3.6.1	Cryptography Overview	3-18
3.6.2	Symmetric Key Encryption -- The Conventional Approach	3-20
3.6.3	Public Key (Asymmetric) Cryptography	3-22
3.6.4	Security Key Considerations: Performance and Protection	3-24
3.6.5	Digital Signatures	3-25
3.6.6	Maintaining Integrity of Information Through Message Digests	3-26
3.6.7	Digital Envelopes -- Combining Symmetric and Asymmetric Key Systems	3-27
3.6.8	Man in the Middle -- Security Weakness of Public Key Systems	3-28
3.7	AUTHENTICATION AND AUTHORIZATION	3-30
3.7.1	Authentication	3-30
3.7.2	Authorization and Access Control	3-31
3.7.3	Accountability and Assurance	3-31
3.8	CERTIFYING AUTHORITIES AND THE PUBLIC KEY INFRASTRUCTURE (PKI)	3-32
3.8.1	Overview	3-32
3.8.2	Certifying Authorities (CAs)	3-33
3.8.3	Digital Certificates	3-33
3.8.4	Players in PKI -- Standards and Technology Providers	3-35
3.9	PUTTING THE PIECES TOGETHER -- A METHODOLOGY	3-38
3.9.1	Overview	3-38
3.9.2	Description of the Methodology	3-38
3.9.3	Detailed Risk Analysis Through Attack Trees	3-39
3.9.4	Development of Countermeasures and Risk Mitigation	3-42
3.9.5	Updating System Designs	3-42
3.9.6	Conclusions	3-42
3.10	CHAPTER CASE STUDY: SECURITY FOR AN INVESTMENT COMPANY (GRQ)	3-42
3.10.1	Overview	3-42
3.10.2	System Conceptual Model	3-43
3.10.3	High Level Security Risks	3-43
3.10.4	Security Requirements	3-44
3.10.5	Management Approach	3-44
3.10.6	Detailed Risk Analysis and Countermeasures	3-45
3.10.7	Choosing Enabling Security Technologies as Countermeasures	3-47
3.11	ADDITIONAL CASE STUDIES AND EXAMPLES OF SECURITY	3-48
3.11.1	Standard Chartered Bank, Americas Front Office: Remote Access Disaster Recovery/Business Continuity Plan	3-48
3.11.2	CNN Denial of Service Attack	3-50
3.11.3	Case Study: Power and Energy	3-51
3.11.4	Analysis of IT Security in Pharmaceutical Trials	3-52
3.11.5	Example: Security in Healthcare	3-53
3.12	CHAPTER SUMMARY	3-54
3.13	REVIEW QUESTIONS AND EXERCISES	3-54
3.14	REFERENCES	3-55

4 SECURITY SOLUTIONS-- USING TECHNOLOGIES TO SECURE SYSTEMS

4-2

4.1	INTRODUCTION	4-4
-----	--------------	-----

4.2	ENTERPRISE NETWORK AND INTERNET SECURITY	4-7
4.2.1	Overview	4-7
4.2.2	Physical Network Access Security	4-8
4.2.3	AAA Servers and Remote Access Dial-in User Service (RADIUS)	4-11
4.2.4	Internet Layer Security Protocols - VPNs and IPSec	4-12
4.3	WIRELESS NETWORK SECURITY	4-18
4.3.1	Overview	4-18
4.3.2	Wireless LAN Security	4-18
4.3.3	Cellular Wireless Network Security	4-21
4.4	FIREWALLS -- PROTECTING THE ENTERPRISE SYSTEMS	4-23
4.4.1	Overview	4-23
4.4.2	Firewall Configurations	4-24
4.4.3	Firewall Design Issues and Firewall Policies	4-26
4.5	OPERATING SYSTEM AND LOCAL SOFTWARE SECURITY -- A QUICK OVERVIEW	4-28
4.5.1	Operating System Security Overview	4-28
4.5.2	Database and Transaction Security Overview	4-29
4.6	MIDDLEWARE SERVICES SECURITY	4-30
4.6.1	Introduction	4-30
4.6.2	Overview of Middleware and Middleware Platforms	4-31
4.6.3	Selected Examples of Middleware Security	4-32
4.7	WEB-XML SECURITY AND SSL	4-35
4.7.1	Overview	4-35
4.7.2	General Web Security Considerations	4-37
4.7.3	XML Security	4-37
4.7.4	Secure Socket Layer (SSL) for Web Security	4-39
4.7.5	S-HTTP (Secure HTTP)	4-43
4.8	DISTRIBUTED APPLICATION PROTECTION	4-44
4.8.1	Overview	4-44
4.8.2	Client Side Security	4-45
4.8.3	Web Server Tier (Middle Tier) Security	4-46
4.8.4	Web Services Security and SAML (Security Assertion Markup Language)	4-46
4.8.5	Back-end System Security	4-47
4.8.6	Email Security -- S/MIME and PGP	4-47
4.8.7	Electronic Payment Security Through SET	4-48
4.8.8	Mobile Applications Security	4-49
4.8.9	Additional Application Security	4-50
4.9	PUTTING THE PIECES TOGETHER -- BUILDING A SECURITY SOLUTION	4-51
4.9.1	Overview	4-51
4.9.2	Establishing a Solution Architecture	4-52
4.9.3	Intrusion Threats Due to Networks	4-54
4.9.4	Intrusion Threats Due to Middleware	4-55
4.9.5	Intrusion Threats for Applications	4-56
4.9.6	Evaluating Security Versus Availability	4-56
4.10	CHAPTER CASE STUDY -- SECURITY SOLUTION FOR GRQ	4-57
4.11	SUMMARY AND CONCLUSIONS	4-61
4.12	REFERENCES	4-61

5.2.14	beBetter Networks Chooses a FireWall	5-12
5.2.15	Centex Avoids the Nimda Worm	5-13
5.3	STATE OF THE MARKET --- COMMERCIAL PRODUCTS	5-14
5.3.1	State of the Market in Management Platforms	5-14
5.3.2	State of the Market in Security	5-15
5.4	STATE OF THE ART -- RESEARCH ISSUES AND TRENDS	5-16
5.4.1	Overview	5-16
5.4.2	Evolution of Real-Time Enterprises	5-17
5.4.3	Technology Applications in Management Platforms	5-18
5.4.4	Security and Intrusion Tolerance State of the Art	5-21
5.5	EXERCISES	5-24

MODULE INDEX

MODULE (TUTORIALS): Short Tutorials and Detailed Discussion on Special Topics

1 NETWORK TECHNOLOGIES – A SHORT TUTORIAL 1-3

1.1	INTRODUCTION	1-4
1.2	LOCAL AREA NETWORKS, WIDE AREA NETWORKS, AND METROPOLITAN AREA NETWORKS	1-6
1.2.1	Local Area Networks	1-6
1.2.2	Wide Area Networks	1-8
1.2.3	Metropolitan Area Networks	1-9
1.3	ENTERPRISE NETWORKS AND NETWORK ARCHITECTURE	1-10
1.3.1	Overview	1-10
1.3.2	The Open System Interconnection (OSI) Reference Model	1-11
1.3.3	Network Interconnectivity	1-12
1.4	BROADBAND AND WIRELESS NETWORKS	1-13
1.4.1	Overview	1-13
1.4.2	Broadband Networks	1-14
1.4.3	Wireless Networks	1-15
1.5	OVERVIEW OF INTERNET	1-16
1.5.1	What is Internet?	1-16
1.5.2	User View of Internet	1-18
1.5.3	Next Generation Network and Internet	1-20
1.6	CHAPTER SUMMARY	1-22
1.7	ADDITIONAL SOURCES OF INFORMATION	1-23

2 OBJECT ORIENTED CONCEPTS, JAVA, AND UML - A SHORT TUTORIAL 2-1

2.1	INTRODUCTION	2-2
-----	--------------	-----

2.2	BASIC OBJECT CONCEPTS	2-2	
2.2.1	Object: The Basic Building Block	2-4	
2.2.2	Messages: Activating Objects	2-5	
2.2.3	Classes	2-6	
2.2.4	Inheritance	2-6	
2.3	OBJECT BASED VERSUS OBJECT ORIENTATION	2-7	
2.3.1	Abstraction	2-8	
2.3.2	Encapsulation (Information Hiding)	2-8	
2.3.3	Polymorphism	2-10	
2.4	OBJECT ORIENTED USER INTERFACES	2-10	
2.5	OBJECT ORIENTED DESIGN AND PROGRAMMING	2-11	
2.6	OBJECT ORIENTED DATABASES	2-12	
2.7	OBJECT-ORIENTED MODELING	2-15	
2.7.1	Object Oriented Analysis -- Building The Object Model	2-15	
2.8	OBJECT MODELING BY USING UNIFIED MODELING LANGUAGE (UML)	2-25	
2.8.1	What is UML	2-25	
2.8.2	Importance of UML	2-25	
2.8.3	Some important features of UML	2-25	
2.8.4	UML Summary	2-29	
2.9	A QUICK TOUR OF JAVA AND JAVA APPLETS	2-29	
2.9.1	Java Overview	2-29	
2.9.2	Java Applets Versus Java Applications	2-31	
2.9.3	Key Java Features	2-31	
2.9.4	Java Security Concerns	2-33	
2.10	JAVA PROGRAMMING AND DEVELOPMENT ENVIRONMENTS	2-34	
2.10.1	Getting Started	2-34	
2.10.2	An Applet	2-36	
2.10.3	Example of a Java Application	2-37	
2.10.4	Java Development Tools and Environments	2-38	
2.11	JAVA IN WEB ENVIRONMENTS -- A CLOSER LOOK AT JAVA APPLETS	2-38	
2.11.1	Java-enabled Web Browsers	2-38	
2.11.2	A more significant Java Applet	2-40	
2.11.3	An Applet/Application combination	2-41	
2.11.4	More Complex Applets	2-42	
2.11.5	Java Servlets	2-43	
2.11.6	The Java Virtual Machine (JVM)	2-44	
2.11.7	Differences among JVM Implementations	2-45	
2.12	STATE OF THE PRACTICE: GENERAL OBSERVATIONS	2-45	
2.13	SUMMARY	2-46	
2.14	ADDITIONAL INFORMATION	2-46	

3 DATABASE TECHNOLOGIES AND SQL -- A SHORT TUTORIAL 3-1

3.1	INTRODUCTION	3-2
3.2	DATABASE MANAGEMENT CONCEPTS	3-2
3.2.1	Files and Databases	3-2
3.2.2	Database Management System (DBMS)	3-3
3.2.3	Data Models and Categories of DBMS.	3-3
3.2.4	Data View Support	3-4
3.2.5	Data Definition Facilities	3-5
3.2.6	Data Manipulation Facilities	3-5
3.2.7	Operational Facilities	3-5
3.3	OVERVIEW OF RELATIONAL DATABASES	3-6
3.4	SQL -- A QUICK OVERVIEW	3-9
3.4.1	Data Definition	3-9
3.4.2	Data Retrieval	3-9

3.4.3	Data Modification	3-11
3.4.4	View Support	3-11
3.4.5	Administrative Facilities	3-12
3.4.6	Embedded SQL	3-12
3.4.7	Performance	3-13
3.4.8	SQL Products	3-14
3.4.9	Strengths and Weaknesses	3-14
3.5	SQL -- A CLOSER LOOK	3-15
3.5.1	Data Definition	3-15
3.5.2	Data Manipulation	3-22
3.5.3	Data Administration	3-34
3.5.4	References for Additional Information	3-35
3.6	OBJECT-ORIENTED SYSTEMS AND DATABASES	3-36
3.6.1	Introduction	3-36
3.6.2	Object-Oriented Databases	3-36
3.6.3	Objectizing a RDBMS	3-38
3.7	OVERVIEW OF DATABASE DESIGN	3-39
3.8	CHAPTER SUMMARY	3-41
3.9	CASE STUDY: DATABASES FOR XYZCORP	3-42
3.10	KEY REFERENCES	3-43

4 WEB ENGINEERING AND XML PROCESSING-- A CLOSER LOOK 4-1

4.1	INTRODUCTION	4-2
4.2	HTTP DESIGN -- A CLOSER LOOK	4-2
4.2.1	HTTP Server Design	4-2
4.2.2	HTTP Methods and Headers	4-3
4.2.3	HTTP 1.1 Highlights	4-5
4.2.4	HTTP/TCP Interactions	4-7
4.3	WEB PERFORMANCE AND WORKLOAD MEASUREMENT	4-7
4.3.1	A Simple Web Performance Model	4-7
4.3.2	Performance Measurements	4-12
4.3.3	Workload Characterization	4-13
4.4	XML PROCESSING	4-13
4.4.1	Highlights of XML	4-13
4.4.2	XML Versus Other Description Languages	4-14
4.5	XML TECHNOLOGIES	4-16
4.5.1	DTDs and XML Schema	4-16
4.5.2	XSL(eXtensible Style Language)	4-17
4.5.3	XML Query Languages	4-17
4.5.4	XLink, XPointer	4-17
4.5.5	How XML Works: XML Data Validation	4-17
4.6	CLIENT VERSUS SERVER SIDE XML PROCESSING AND XSL	4-19
4.6.1	Overview	4-19
4.6.2	Client Side Processing:	4-20
4.6.3	Server Side Processing	4-20
4.7	HANDLING XML DATA BY USING DATABASES	4-21
4.7.1	Using Relational Databases -Mapping between XML and Relational Databases	4-21
4.7.2	Data Storage in Native XML format	4-25
4.7.3	General Comments	4-29
4.8	SOURCES OF ADDITIONAL INFORMATION	4-30

5 CORBA TECHNOLOGIES -- A CLOSER LOOK 5-1

5.1	INTRODUCTION	5-1
5.2	CORBA 3.0 -- THE LATEST CORBA	5-2

5.2.1	Evolution of CORBA	5-2
5.2.2	Locating CORBA Objects – The IOR (Interoperable Object Reference)	5-3
5.2.3	Object Adapters and POA (Portable Object Adapters)	5-4
5.2.4	Objects by Value	5-6
5.2.5	CORBA Messaging - Asynchronous Messaging and Quality of Service Control	5-6
5.2.6	Minimum, Fault-Tolerant, and Real-Time CORBA – More Quality of service control	5-7
5.2.7	Event/Notification Services	5-8
5.2.8	Internet integration	5-11
5.2.9	Inter-ORB Architecture (GIOP and IIOP)	5-12
5.2.10	CORBAComponents Package	5-14
5.2.11	CORBA Scripting	5-15
5.2.12	CORBA 3.0: Conclusions	5-15
5.2.13	Other OMG Activities	5-15
5.3	CORBA OPERABILITY (PERFORMANCE, SCALBILITY, FAULT TOLERANCE) AND SUMMARY	5-16
5.3.1	CORBA Reality Check -- Operability (Performance, Scalbility, Fault Tolerance) Issues	5-16
5.3.2	CORBA Summary	5-18
5.4	A DETAILED CORBA EXAMPLE	5-20
5.4.1	Overview	5-20
5.4.2	Create CORBA Definitions	5-21
5.4.3	Build the Server	5-23
5.4.4	Build Client (Static Invocation)	5-25
5.4.5	Building a Client (Dynamic Invocation)	5-26
5.5	SUMMARY	5-27
